Vinyl Siding/Soffit Molding

The combination of a siding and soffit receiver plus a crown molding in one trim part speeds up installation time and lowers costs.

Amerimax Building Products, Inc. has supplied siding and trim for over 25 years. The newest addition to the product line is a Vinyl Siding/Soffit Molding. This patent pending part serves as a soffit receiver, siding receiver and a decorative crown molding. It offers you:

- A cost-effective alternative to a multiple piece system.
- The combination of a siding and soffit receiver plus a crown molding in one trim part speeds up installation time and lowers costs.
- A one-piece part will not allow water infiltration that could occur with a two-piece installation.
- The positive lock installation keeps the siding attached even in unusually high winds.
- UV inhibitors have been added to ensure durability and long-term beauty.
