

TAKE CONTROL OF YOUR  
*outdoor living space*

 **EQUINOX**  
LOUVERED ROOF

**MAKE THE MOST OF YOUR**  
*outdoor living space*

*Create comfortable outdoor living in any season with the flip of a switch or remote control. Open up to take advantage of a breeze or let a little sunshine in. Rain clouds...not a problem. Equinox's integrated gutter system channels rain water away.*

***Equinox Louvered Roof***

Enjoy outdoor living, rain or shine, with the convenient Equinox Louvered Roof system. This versatile, solar-powered, and motorized adjustable patio cover system combines style and function and enhances your outdoor living environment.

***Style***

The Equinox Louvered Roof system is designed to maximize the comfort and functionality of any outdoor living area, including patios, courtyards, outdoor kitchens, swimming pools, spas, and much more. Equinox is available in white and sandstone. Virtually any material and finish can be applied to create your desired appearance, including aluminum, steel, wood, stucco, and paint.

## Function

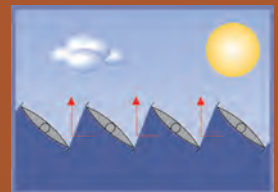

Equinox complements any architectural style, existing structures with gable or pitched roofs, bay windows, doors, even angled roofs or walls. Equinox can also be engineered for free-standing applications.

Create comfortable outdoor living in any season with the flip of a switch or remote control. Louvers can be positioned anywhere within their 160° range of motion for the exact amount of protection or ventilation desired. The solar-powered battery pack eliminates environmental impact and expense since no additional energy is required.

### Full Sun

Provides direct sunlight and full ventilation.

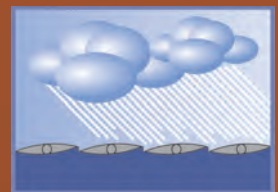

### Indirect Sun

Provides indirect lighting and ventilation.

### Directional Sun

Directs full morning or winter sun and breeze for enhanced comfort.

### Closed

Provides a rainproof outdoor living space.

- Sun or shade on demand
- Waterproof – seals tight when completely closed
- Motorized – easy operation with switch or remote control
- Powered by a solar charged battery
- 160° range of motion
- Customizable – integrates with existing architecture
- All metal materials – more durable than cloth or wood
- Versatile – complements brick, stucco, fiberglass, wood columns and fascia
- Stylish and contemporary
