Riviera Series Patio Doors

The all new **Riviera French Slider** combines the traditional wide rail look of a French Door into a sliding door making it a perfect choice where space or traffic patterns may not allow a hinged or swing style door.

The sophistication of the **Riviera Series** is reflected in wide rails and contoured moldings that embrace the glass and enhance the refined design.

Choose from multiple configurations all featuring smooth gliding operation with dual tandem rollers on a stainless steel track system.

In addition to it's beauty the **Riviera French Slider** incorporates rugged durability with rigid metal reinforcement at the interlocking meeting rail.

New Horizon Series Patio Doors

The *New Horizon* Patio Door Series will transform your home with versatile and elegant design that maximizes viewing area while emphasizing quality and performance.

Available in a variety of configurations 2-panel, 3-panel and 4-panel with optional overhead transoms this series will compliment any home while offering you unparalleled choices.

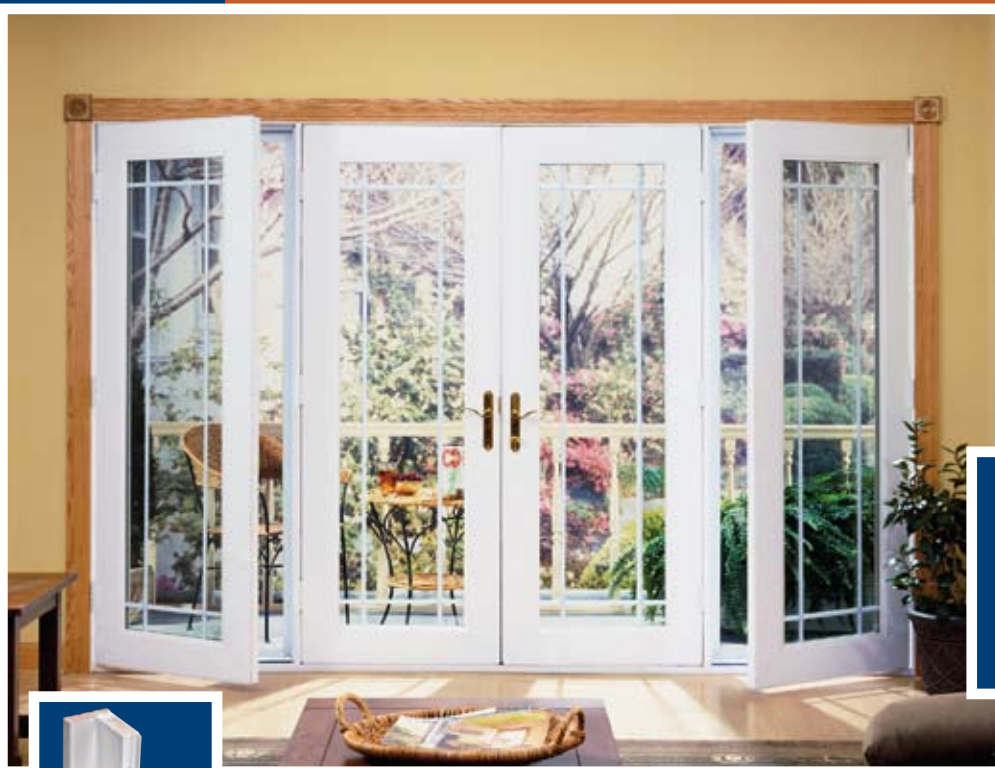

Optional hardware choices are offered in a wide array of designer accents.

- Heavy duty plated steel tandem rollers glide above debris on a raised stainless steel monorail track system for continued smooth and easy operation.
- Structural metal reinforcement within vertical sash rails enhance performance against outside elements.
- Fusion welded frame and sash construction ensures structural integrity with long-term beauty and durability.
- Triple seal positive interlocking at the meeting rail provides weather tightness and forced entry resistance.

Versailles Series

Patio Doors

The *Versailles Series* is all about choice and versatility, providing a wide array of styles and configurations that are certain to meet your individual needs.

The *Versailles Series* of Hinged Patio Doors and Side-Lites presents Single Entry, Center Hinged style and True French door design (in swing or out swing). Optional Side-Lites may be added with matching wide or narrow French rail. Choose from operable venting in swing Side-Lites or the traditional fixed lite.

Designed for strength and beauty the *Versailles Series* combines a rugged 1 1/4" wooden mainframe with maintenance free vinyl cladding.

The fusion welded sash panels are attached with three heavy-duty steel adjustable hinges to ensure stability and durability.

The multipoint locking system affords optimum weather seal and security.

Brass hardware is the standard with additional designer color options available.

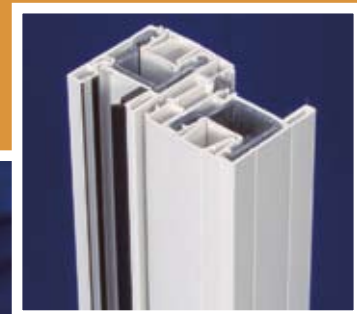

Performer Pro Series

Patio Doors

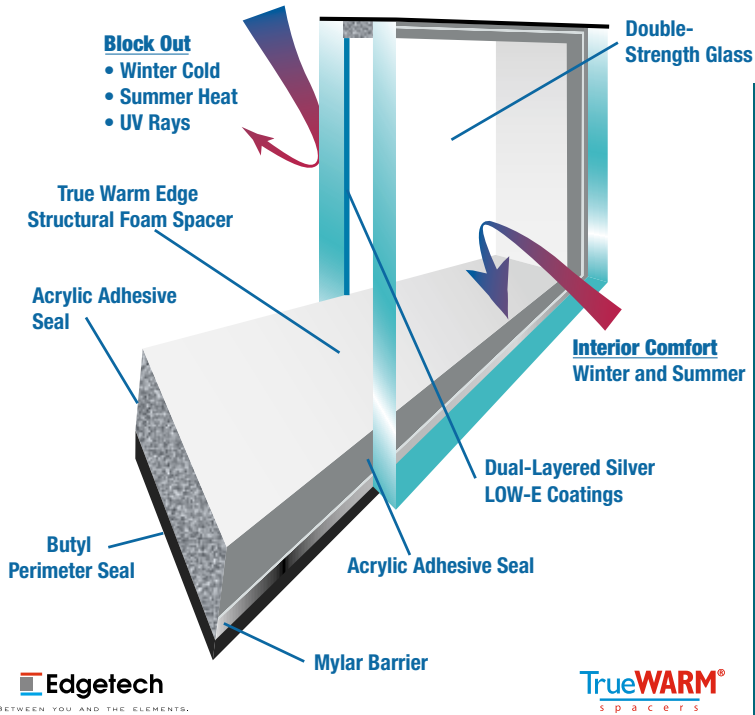

The *Performer Pro Series* preserves all the energy efficiency and reliable performance that has made it a long time favorite. The new fusion welded sash frame provides enhanced appearance, increased stability and the *Performer Pro* now offers an expanded selection of designer hardware options.

The *Performer Pro* features:

- 1 1/4" Treated wood master frame with heavy duty vinyl cladding for durability and maintenance free performance
- Multi chambered fusion welded sash frame to enhance appearance and energy efficiency
- Structural metal reinforcement in the vertical sash rails for strength and security
- Dual tandem roller wheels ensure quiet smooth operation
- Sloped sill with raised monorail track

All Amerimax Patio Door Series Offer The Ameriglass™ System

The Ameriglass™ Insulated Glass System features Low Emissivity glass coated with dual microscopic layers of silver, combined with Edgetech TrueWARM® Structural Foam Spacer to create a dual sealed glass unit with superior energy efficiency and long-term durability. The Ameriglass™ System has now been expanded to include Ameriglass™ Low E Solar with additional tinting and enhanced blocking of unwanted solar heat gain.

Ameriglass™ System Provides:

- Maximum UV Protection
- Extremely Low Thermal Transmittance
- Superior Condensation Resistance
- Reduced Sound Transmission
- Long-term Durability
- Lifetime Warranty

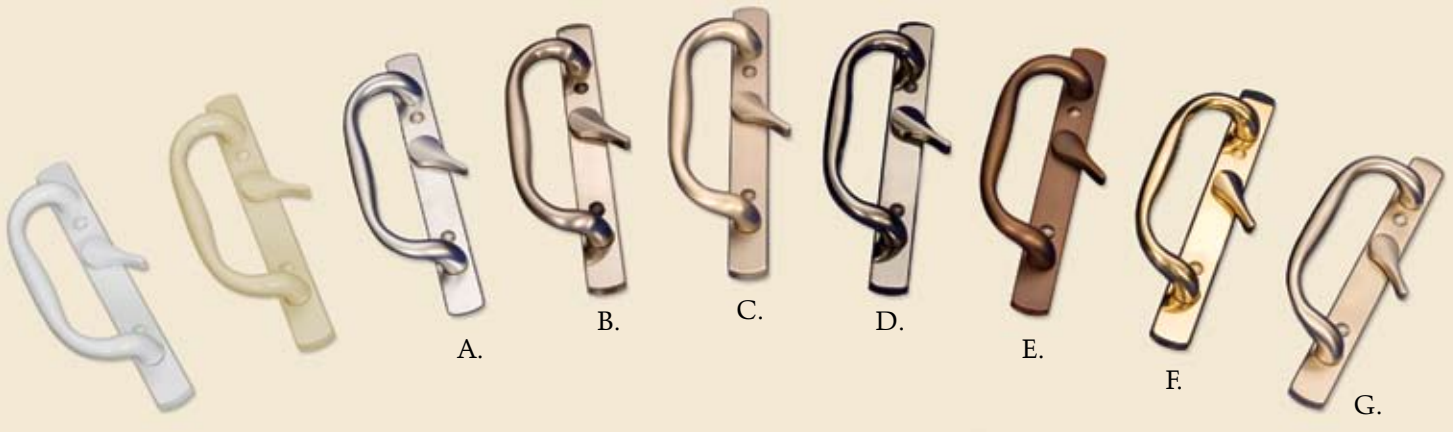

You Will Enjoy Energy Savings Year-Round.

All Amerimax Patio Doors with the Ameriglass™ IG system meet or exceed Energy Star® requirements in all climate zones.
